FIRST AID

If on skin
• Take off contaminated clothing.
• Rinse skin with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER [PYRETHRIN]
Have the product container or label with you when calling a poison control center or doctor, or offer for recycling if available.

PRECAUTIONARY STATEMENTS Hazards To Humans & Domestic Animals
CAUTION
Harmful if absorbed through skin. Causes moderate irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Containers larger than one pound may not be used or stored in food handling establishments.

Environmental Hazards
This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwater or rinsate.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original sealed container in a cool, dry place inaccessible to children and pets.

APPLICATIONS WITHIN FOOD AREAS:
For use in and around food processing plants and warehouses, bakeries, beverage plants, restaurants, supermarkets, meat and poultry processing plants, hotels, motels, hospitals and schools.

LIMITED TO CRACK AND CREVICE TREATMENT ONLY: Using a bulbous duster, apply a small amount of material directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, motor housings, junction boxes or switch boxes, conduits or hollow equipment legs where Cockroaches, Ants, Spiders, Boxelder Bugs and Crickets hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

APPLICATIONS OF TOWER DUST:
For use in and around homes, institutions, offices, business buildings, hotels, motels, theaters, schools, warehouses, freight trains and railroad cars.

Using a bulbous duster, apply a small amount of material directly into cracks and crevices such as Ants, Cockroaches, Silverfish, Firebrats, Spiders, Boxelder Bugs, Ticks, Lice and Fleas in animal quarters, distribute Drione® at the rate of 2 oz/100 sq ft of surface area. Apply a continuous visible film underneath and behind stairs, refrigerators and appliances. Treat at a rate of 1 oz/2,000 sq ft of surface area. Repeat treatment as necessary.

STORED PESTS: To aid in the control of Cadelles, Cheese Mites, Cigarette Beetles, Confused Flour Beetles, Dark Mealworms, Drugstore Beetles, Grain Mites, Granary Weevils, Red Flour Beetles, Rice Weevils, Sawtoothed Grain Beetles and Yellow Mealworms in mills, elevators and granaries. Clean waste materials, dust, dirt, and any other debris. Thoroughly treat walls, floors and other surfaces in bins, storage and handling areas. Apply into cracks and crevices and other difficult to reach areas where insects may hide.

BEES AND WASPS: It is generally advisable to treat Wasp and Bee nests in the evening when insects are less active and have returned to the nest. Using hand or power duster or other suitable means, with extension tubes if necessary, thoroughly dust nest and entrance and surrounding areas where insects alight. Nests in wall voids can be located by listening with your ear against the wall. Blow dust at a horizontal line two feet above the nest, and repeat treatment one or two days after treatment to ensure complete kill, then remove and destroy nest to prevent emergence of newly hatched insects. If removal is not feasible, retreat the nest if necessary. Care should be taken when treating overhead nests so that neither the product nor the nest falls on people standing below.

SEWER TREATMENTS: American and Oriental Cockroach infestations in sanitary sewers may be treated with approximately 6 ounces of Drione per manhole. When treating sewers, one manhole per 200 feet of line should be treated. Treatments of nests are made removing the manhole cover and replacing with a disc of plywood bored to receive the usual flexible hose from portable or truck-mounted ventilating equipment. Six ounces of Drione is introduced into the ventilating air to be dispersed quickly and thoroughly through the system.

BEDS: Take bed apart. Dust into knots and channels. If hollow, so as to provide a free path, see that the interior of framework is well dusted. Mattresses should be dusted, especially tufts, folds, and edges. Picture frame moldings and all cracks and crevices in the room should be treated.

DRYWORLD TEMITES: To protect against entrance, using an electric or hand operated rotary duster, distribute Drione through an entry, e.g. crawl hole into attic and crawl space of building, at a rate of 1 lb/1,000 sq ft of floor area. All vents and blowers on the windward side should be closed. All wood surfaces should be covered. In case of localized infestations probe to locate galer- iet holes or fan holes to inject Drione into the galleries. If reasonably heavy infestation has already developed, fumigation should be employed.

PLEAS: Surfaces of kernels should be dusted at the rate of one oz/250 sq ft. Heavily infested lawns, basements, and crawl spaces should be dusted at the rate of 16 oz/1,000 sq ft. Repeal as necessary.

SOWBUGS, PILGBUGS, GROUND BEETLES, EARTHWORMS, MILLIPEDES AND SCORPIONS: Dust around doors and windows and other places where these pests may enter premises.

IMPORTANT: READ BEFORE USE
Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If you do not accept the terms, return the unused product container at once. By using this product, user or buyer accepts the following conditions, disclaimer of war- ranties and limitations of liability.

CAUTION

PRECAUTIONARY STATEMENTS

Hazards To Humans & Domestic Animals

CAUTION

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash
thoroughly with soap and water after handling. Containers larger than one pound may not be used or stored in
food handling establishments.

Environmental Hazards

This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of
equipment washwater or runoff.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original sealed container in cool, dry place inaccessible to children and pets.

Disposal: If empty or non-refillable containers. Do not reuse or refill this container. Place in trash or offer it
for recycling if available.

If purity fails: Call your local solid waste agency for disposal instructions. Never place unused product down
any indoor or outdoor drain.

If mixed: Call your local solid waste agency for disposal instructions. Never place unused product down
any indoor or outdoor drain.
